

Case data for all running processes using the Rest API for Workflow Accelerator

Problem:

How can I access the following case data for all running processes using the Rest API for Workflow Accelerator?

1. Case Start Date & Time Stamp
2. Case End Date & Time Stamp
3. Case ID
4. Each Task/step wise Start date & time stamp

Solution:

This is a known limitation that has already been reported to our Product Managers. If you are affected by this limitation and want to be kept up to date about this feature request, please create a ticket in our [Support Portal](#) and reference this knowledge base article.
